

LIST OF MULTIPLE RODENT STRAINS WITHIN e-PROTOCOL

(Please Type In All Information – No Handwritten Documents will be Accepted)

e-Protocol #:	li .	nvestigator Name:	Species:	

STRAIN (include Background Strain &	ADVERSE PHENOTYPE*		SEV**	HOUSING FACILITY	ROOM	USDA PAIN CATEGORY*** (Insert actual numbers of animals per category)			VENDOR (e.g., Breeding	
JAX Laboratory Catalog #)	YES	NO	SEX**	(Building C or Building V)	NUMBER	В	С	D	E	Colony, CMU Approved or Both)

^{*}ADVERSE PHENOTYPE: If this is a genetically modified strain, do you expect pain or distress related to the phenotype that could be associated with an adverse impact on animal well-being (either before or after experimental manipulation)? If so, measures to relieve this pain and distress must be addressed in the body of the protocol.

^{**}SEX: Enter Male, Female, or Either

^{***} **USDA PAIN CATEGORY:** Enter the total number of the strain to be used in each Pain Category. If animals will be used in more than one category, enter the number in the higher category. EXAMPLE: If 150 mice will be used in Category C for ear punching and 50 of those mice will then be used in Category D for laparotomy, list 100 mice in Category C and 50 mice in Category D.
