Possible Standardized Patient Diagnoses for Identification for the 2020 U.S. National Brain Bee

- Competitors will spend 4 minutes with a standardized patient, a professional actor/actress portraying an individual with one of the diseases/disorders/syndromes listed below.
- A competitor may ask no MORE than 10 questions to each patient. These must be questions that can be answered by the standardized patient with Yes/No/I don’t know.
- Each competitor may order 2 tests from a standardized list of diagnostic tests – where they will be given immediate test results by the patient.
- Each competitor will interview the same 10 standardized patients.
