

NEOMED MMScA Program

Clinical Keywords

ICU Rotation

- **Systemic inflammatory response syndrome and sepsis**
- **Ventilator assisted pneumonia (VAP)**
- **Invasive line changes**
- **Basic image interpretation (chest X-ray):**
  - Endotracheal tube and mainstem intubation
  - Nasogastric tube position
  - Central line position
  - Pacemakers and implantable cardioverter defibrillators
  - Lucency and opacity
  - Costophrenic angles and hemidiaphragm
  - Anterior-posterior vs. posterior-anterior imaging
  - Increasing image quality
  - Hyperinflation
  - Pneumothorax
  - Pulmonary edema
  - Pleural effusion
  - Septal (Kerley) lines
  - Cardiac hypertrophy
- **TPN and feeding**
- **Consequences of ICU sedation**
- **Weaning from intubation and rapid shallow breathing index**
- **Glycemic control**
